Consumer Price Index ◆ February 2010

Consumer Price Index (2002=100)

Highlights

- British Columbia's Consumer Price Index (CPI) rose 1.2% from February 2009. Growth in consumer prices slowed in all other provinces, with the largest year-over-year increase found in New Brunswick. Nationally, consumer prices rose 1.6% in the 12 months to February.

- Among the metropolitan areas, Saint John posted the greatest increase in consumer prices (+3.4%) from last February, with Charlottetown and St. John's close behind at 2.4%. Compared to last February, Calgary experienced the lowest increase in consumer prices (+0.7%) compared to last February. The CPI rose in Vancouver (+1.2%) and Victoria (+1.0%).

- BC's overall energy prices went up 6.7% between February 2009 and February 2010, with gasoline prices (+12.8%) and fuel oil & other fuel (+13.2%) continuously being the main drivers. Other significant increases were seen in recreation (+8.9%) and reading material and other printed matter (+7.2%). Food prices dipped slightly (-0.1%) with slumps in the cost of fresh vegetables (-11.7%) and fruits (-9.0%). The price of shelter dropped (-2.4%), largely driven by the drop in owned accommodation (-4.2%).

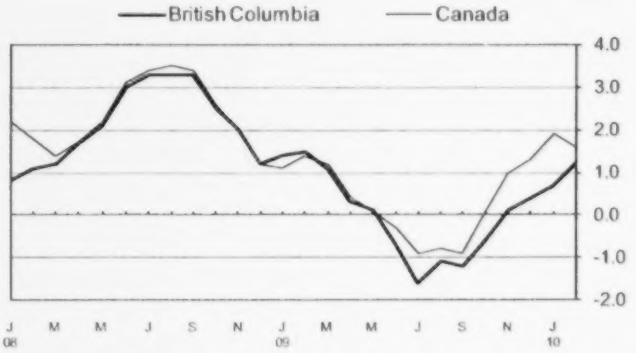
- BC's All-Items CPI excluding energy rose 0.7% from February 2009. The comparable figure for Canada was 1.3%.

Note: Statistics Canada will release the March Consumer Price Index on April 23, 2010.

2002=100	All-Items Index	% Change from	
	February 2010	January 2010	February 2009
Canada	115.6	0.4	1.6
BC	113.2	0.9	1.2
Vancouver	113.9	0.7	1.2
Victoria	112.5	0.8	1.0
Core Canada[1]	115.2	0.7	2.1

BC and Canada Inflation Trend

(% change, same month of previous year)



2002=100	Latest 12-month Average Index (ending in February 2010)	Latest 12-month Average % Change	2009 Annual Average % Change
Canada	114.8	0.4	0.3
BC	112.5	-0.1	0.0
Vancouver	113.1	0.0	0.1
Victoria	112.0	0.0	0.1

[1]**The Core CPI for Canada:** Defined by the Bank of Canada as the All-items index excluding the eight most volatile components (fruit, vegetables, gasoline, fuel oil, natural gas, mortgage interest, inter-city transportation and tobacco products). Also excluded is the effect of changes in indirect taxes on the remaining components.

Consumer Price Index—Terms and Definitions

Base Effect

The 12-month variation in the CPI is calculated by comparing the current month's index with the index for the same month of the previous year. The 12-month change is represented by the difference in the indexes of the reference months. Thus, the 12-month variation can decrease from one month to the next merely because the base serving as the point of comparison increased.

Source: Statistics Canada

Twelve-Month Percent Changes

Also referred to as "year-over-year", twelve-month percent changes compare indexes for a given month to indexes for the same month of the previous year. As they compare two points in time, they are influenced by unusual or temporary events that can affect either of the two months. Their calculation does not include any of the intervening monthly indexes.

Source: Statistics Canada

Annual Average Index

Annual average indexes are calculated by averaging index levels over the 12 months of the calendar year. These data should not be confused with the 12-month change in the CPI. By the nature of the calculation, averaging indexes over the calendar year gives a better representation of price behaviour over the whole year and is closer to the concept of an average price. The use of annual averages is considered the preferred option for indexation purposes.

Source: Statistics Canada

Latest Twelve-Month Average Index

The latest twelve-month average index (ending in the current month) is a 12-month moving average of the indexes of the most recent 12 months. It is calculated like the annual average index. Hence, in theory, the December twelve-month average index would be equal to the annual average index for the calendar year. However, in practice, when BC Stats makes these calculations from published data, the December 12-month average index may differ from Statistics Canada's published annual average index due to rounding.
